

## 95 – 703 B: Database Management

### SQL Assignment #1 (hardcopy due on October 27, in class before the lecture starts)

Use the *JustLee Books* database to answer questions below (from your class textbook).

*Turn in a well formatted printout of your SQL statements as they were executed in the SQL\*Plus environment and the results of running each statement. Set the LINESIZE and PAGESIZE values optimally to ensure that there are no wrapping lines or repeated column headers in the results (for further formatting tips refer to the “**Formatting SQL Queries**” document available on the class website). Identify each answer clearly. Each question should be answered by a single SQL statement unless requested otherwise. Use only the SQL concepts covered in class so far.*

Chapter 4: Hands-On Assignments 1 – 4 (pages 137 – 138)

Chapter 8: Hands-On Assignments 4, 6, and 10 (page 292)

Chapter 9: Hands-On Assignments 2, 4, 5, and 7 (pages 344)
